

Can't upload .jpg for Edit Profile...

[eric.sherrill](#) 2 posts since

Mar 10, 2008

Looks like a minor bug in the Edit Profile screen where there is a section for uploading "Your Image" - I have tried various known good .jpg files without success. However I have uploaded one of the same files successfully as an Avatar (see attached sa.jpg). Is this a bug, is "Your Image" superfluous due to Avatar and thus should be removed, or ???
